MYA Price=national average price received by producers during the 12-month marketing year.

Reference price (column E)=statutory price levels apply for crop years 2014-2018.

1/ F= Final MYA prices--Source: National Agricultural Statistics Service (NASS), Agricultural Prices on the publishing dates listed under column C. P=Projected MYA prices--Source: USDA's World Agricultural Supply or Demand Estimates report or Interagency Commodity Estimates Committee Minutes. MYA price projections are the mid-point of the price forecast range, when applicable.

2/ The annual benchmark price (columns F-J) equals the higher of the reference price or the respective MYA price. Highlighted annual benchmark prices note when reference prices replace MYA prices. ARC-CO benchmark revenue equals the final ARC-CO benchmark price (column K) multiplied by the benchmark county yield (5-year average of county yields, excluding the high and low yields). The ARC-CO revenue guarantee equals 86% of the ACRE-CO benchmark revenue.

3/ The ARC-CO benchmark price (column K) equals the 5-year average of the 2010/11-2014/15 annual benchmark prices, excluding the high and low prices (noted with a strikethrough line through the prices). The ARC-CO benchmark revenue equals the ARC-CO benchmark price multiplied by the ARC-CO county yield ( 5-year average of county yields, excluding the high and low yields). The ARC-CO revenue guarantee equals 86% of the ARC-CO benchmark revenue.

4/ The ARC-CO price (column N) equals the higher of the: (a) 2015/16 MYA price (column L), or (b) 2015 national average loan rate (column M). The actual ARC revenue equals the actual ARC-CO price multiplied by the actual ARC-CO county yield. The ARC-CO payment rate is the lesser of: (a) 10% of the ARC-CO benchmark revenue, or (b) the ARC-CO revenue guarantee minus the actual ARC-CO revenue.

5/ Excludes temporate japonica rice.
